

Summary

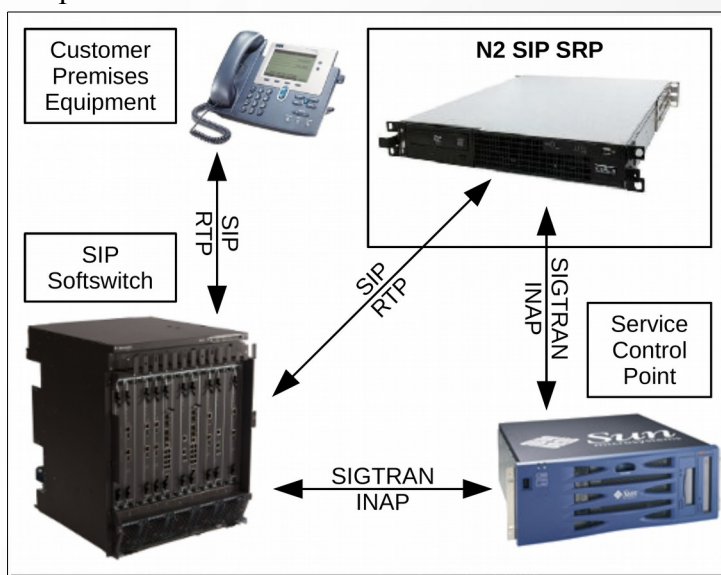

The *N-Squared Specialized Resource Platform* is a Intelligent Network controlled voice interaction server. The N2 SRP provides a cost-effective solution for enabling INAP-controlled voice interaction over:

- Conventional ISUP (E1/T1) Trunks, *and/or*
- Next-Generation SIP/RTP Transport.

Built on Linux and commodity hardware (including virtualized deployment), the *N2 SIP SRP* solution combines easy scalability with modern management features and low operational costs.

SIP Protocol Support

With wide standards-based support for SIP, RTP and INAP/CAMEL, the *N2 SIP Specialized Resource Platform* is compatible with most SIP Softswitch and INAP Service Control Points.

Key features include:

- **Standalone Announcements**
- **Constructed Announcements**
- **Cancel/End/Time-Out/Interrupt**
- **DTMF Digit Collection**
- **Variable Parts:**
 - **Natural Language Numbers**
 - **Single/Plural Differentiation**
 - **Multilingual Support**
- **Text-To-Speech**

Text-To-Speech

The *N-Squared SIP SRP* can perform on-demand Text-To-Speech conversion. An embeddable third-party library is used to provide this functionality (such as the Cepstral third-party voice suite). Please contact us for more information on supported voices and languages in the optional Text-To-Speech feature pack.

Graphical Provisioning Interface

The *N2 SIP SRP* offers exceptional ease-of-use via a market-leading web-based provisioning interface. The fine-grained security control allows Telcos to grant secure self-management of announcements to resellers and virtual network operators.

- Secure Management Interface
- User-Based Resource Access
- Automatic Audio Format Conversion
- In-Browser Audio Playback
- Per-File Version Control & Backup
- Global Snapshot & Restore
- Integrated Node Synchronisation

Platform Monitoring & Control

As befits a next-generation solution, the *N2 SIP SRP* service layer includes a web-based point-and-click interface for interaction with the run-time service-layer components.

Via any modern web-browser, system administrators may:

- View running configuration.
- Track service statistics.
- Interrogate in-progress calls.
- Monitor resource usage.
- View system alarms.

Alarms are also directed off-platform via SNMP.

Scalability & Redundancy

The modular architecture of the *N2 SIP SRP* allows each site installation to be configured to meet the relevant performance and geographic distribution requirements for the specific deployment model, e.g.:

Feature Packs

The *N-Squared SIP Specialized Resource Platform* contains base and extension features:

Feature Packs	
Base Features <ul style="list-style-type: none"> • SIP/RTP Sessions with INAP Control • Web-Based Announcement Management • Web-Based Platform Monitoring & Control • English Language Variable Parts 	Language Packs <ul style="list-style-type: none"> • Additional Language Packs are available on-request. Text-to-Speech <ul style="list-style-type: none"> • On-the-Fly + Cached Speech Encoding • Please Enquire for Voice and Languages

Support & Maintenance

Ongoing 24/7 platform support and maintenance contracts are offered.

About N-Squared

N-Squared is an Oracle Gold Partner based in New Zealand. We are specialist providers of products and services for the Telecommunications domain.

Key Protocol Specifications

ETSI INAP (ETS 300 374-1)
 CAMEL Phase 2+ (ETSI TS 101 046)
 SIGTRAN (RFC 2960, 4666, 3868)
 SIP (RFC 3261)
 RTP (RFC 3550)
 RTP DTMF (RFC 4733)

Note: Protocols are supported to the extent necessary for advertised features.
